HAPPY 30TH

ANNIVERSARY SHRDC!

by MARISSA Z

Established on 14th February 1992, SHRDC has now finally unlocked another incredible milestone that is being 30 long years in the industry. Wow, what an unbelievable and fulfilling journey it has been. Starting with only 5 staff up until 1999, the company has grown with a huge number of staffs including trainers, interns, trainees, students, and contract workers. Since then, we have continuously strengthened our branding by partnering up with many credible industries alike as well as becoming partners with them. After 3 decades, our company's vision and mission remain the same that is to be "Leading Transformation Through Training" which has become our tagline for the longest time, and we very much still stand by it.

3 DECADES OF LEADING TRANSFORMATION THROUGH TRAINING

by MARISSA Z

To commemorate this special day, we had an entire day of celebrating it uniquely - which was by having SHRDC's very own treasure hunt day! Where all staff was given clues, hints that require them to solve the riddles that are related to the company. At the end of the day, what's a birthday without a little party and a cake right? Thank you to everyone involved to make this day a very special one.

"I have had a lot of Firsts with SHRDC. I'm thankful for the opportunities SHRDC has given me, especially when I got to travel to many countries like Japan, the UK, the USA, and China. My message to all my coworkers would be: Be open to learn and be Curious"

23 years of Long Service, Meet Rachel Toh

by MARISSA Z

Started her career with SHRDC in 1999, Rachel Toh has now celebrated working here for more than 23 years. Before our current Executive Director Sook Ling, Rachel was under the guidance of Mr. Tan Beng Teong, who was the Executive Director back then. Back in 1999, the company only had 5 staff and Rachel was the company's staff number 6.

Rachel started as a Systems Executive, to handle a new department called Multimedia. Her current position revolves around Corporate Training Sales as well as all Corporate Operations. To Rachel, SHRDC is like a family, everyone is always helping each other to grow, can always seek help or seek comfort like family members. Rachel is very passionate about learning and helping people grow especially in their careers. Learning should not just be on paper, but a mindset, and attitude.

CSR PROGRAMME: BACK TO SCHOOL

by MARISSA Z

On February 19, SHRDC had successfully wrapped up a very special and meaningful event as part of our social responsibility as an organization, for the community by organizing a 'Back to School' programme for school children from the areas of Padang Jawa and Hulu Langat that were severely affected by the flood not so long ago.

Thank you so much to all committee members and volunteers who have been very much involved and invested in this donation drive.

With this, we hope these children will continue to look forward to their future and for better days.

Much love, #SHRDCfamily

MANY THANKS GOES TO COMMITTEE MEMBERS AND STUDENT VOLUNTEERS WHO MADE THE EVENT SUCCESSFUL

WELCOME & ORIENTATION DAY

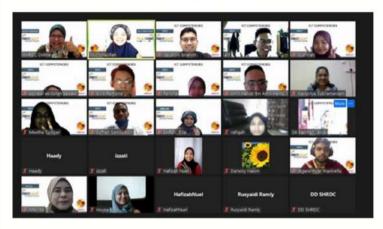

by MARISSA Z

This month, we had welcomed two new groups of training courses which include MIDA - ICT Competence for Industry 4.0 and AI and Machine Learning Competence for Industry 4.0 respectively.

It is always a good feeling and occasion worth celebrating when we keep welcoming new candidates with a lot of potentials.

Welcome on board to all new program candidates, and we hope you will all succeed with flying colors.

RiSE4WRD for Industry4wrd

by MARISSA Z

The RiSE4WRD for Industry4WRD programme is meant to Increase SME manufacturing companies' productivity with recommended steps in MITI's Readiness Assessment.

up to rm25,000 Training grant for malaysian sme employers with iNDUSTRY4WRD READINESS ASSESSMENT (RA) REPORT

For more information, you may reach out to our sales representative, Mr. Farid Aizat at farid.aizat@shrdc.org.my

SHRDC x BOSSARD MALAYSIA FINALLY TAKES FLIGHT!

by MARISSA Z

THANK YOU BOSSARD MALAYSIAN FOR VISITING SHRDC FOR THE FIRST TIME!

With the rise of technology and innovation, Industry 4.0 takes the emphasis on digital technology from recent decades to a whole new level with the help of interconnectivity through the Internet of Things.

After being put on hold for quite some time due to the pandemic, finally, this collaboration project with Bossard Malaysia took off!

We are so excited to share with our followers the outcome of this project, be sure to stay tuned! Many thanks to Bossard representatives who had visited our premise for this project as well as the production team.

We hope all of you enjoyed your time here because we surely did. To many more great things! "Collaborating with like-minded partner to promote #Industry40 technology in Malaysia is always our top priority. Partnering with education partner like Selangor Human Resource Development Centre definitely a catalyst towards this aim" - Bossard Malaysia.

SHRDC JOINS
IOT ASIA+ 2022
DIGITAL EVENT
AS SUPPORTING
ASSOCIATION!

by MARISSA Z

Selangor Human Resource Development Centre (SHRDC) is proud to be a Supporting Organisation of the IoT Asia+ event happening on 16-17 March 2022 to converge communities, ignite changes and transform businesses.

This year, IoT Asia+ expects a greater focus on the key areas such as Healthcare, Retail, Transport & Logistics, Real Estate and more, catalysed by the integration of powerful enabling technologies that include Blockchain, Al and AR amongst others.

Training Program

ENGINEERING COMPETENCE for INDUSTRY 4.0

Class Start Date
14 MAR 2022

2 Months Hands-on Training

Industry Recognized
Certification

Monthly Allowance
Provided

- English Language Proficiency
- Fresh Graduates and/or Retrenched Workforce
- Minimum CGPA 3.0
- Between 21-30 years of age
- Minimum Bachelor's Degree in Electrical/Electronics/Mechatronics/
 Software Engineering/Mechanical

Data Automation and Analytics for Industry 4.0 is designed to equip the participants with knowledge, skills, and competencies in two key and essential areas for Industry 4.0; Data Automation and Data Analytics.

This program provides a high impact hands-on approach towards the application of data collection from machines (especially legacy machines) for easy monitoring, visualization, and processing via a real-time dashboard visualization system. Participants would also be equipped with key fundamental competencies to evaluate machine effectiveness for production enhancement.

This program is also designed to cover data analytics strategies which provides a hands-on approach towards the application of machine learning algorithms to analyze data sets produced and stored to make effective estimation and predictions for decision making. This program provides participants with the key fundamental competencies required to scale up and perform Big Data Analytics (BDA).

Training Program

Data Automation and Analytics

Class Start Date
21 MAR 2022

Industry Recognized Certification

Program Duration: 2 Months

Training Allowance

- English Proficiency Requirement (eg. minimum MUET Band 5 or equivalent, Minimum SPM / STPM B+)
- Minimum Degree in Mechatronics Engineering,
 Electrical and Electronics Engineering,
 Computer Science, Software Engineering.
 Other related backgrounds would be reviewed on a case by case basis.
- Candidates are required to PASS Technical
 Pre-Assessment and Interview requirements

Data Science and Analytics for Industry 4.0 program is designed to develop the future talents in the areas of data science and analytics (e.g. data analyst, data scientist, etc.) which are needed by the industry to progress towards a Smart Nation. This program would provide competency-based modules such as data analytics, data visualization, predictive modeling, and related modules with the aim of producing an industry-driven workforce which are equipped with the knowledge, skills, and competencies in the areas of data science and analytics.

With the progression of industries towards sustainable digital transformation, the numbers of data generated, collected, analyzed, monitored, and stored would increase exponentially in various industries. This would provide the participants with a great potential in career development in this emerging area.
